re: Proposed Court Rule No 2003-47

I am writing to request that the judges of the Michigan Supreme Court NOT deny access of victims of asbestos illnesses to the courts in Michigan.

My father suffers from life threatening illness all relating to his exposure to asbestos materials at his former place of employment. I am sure that you are aware that asbestos is frequently referred to as "the silent killer". And how true that is because many of his fellow employees have either died or are very ill from their exposure to asbestos. That is due entirely because big business knowingly exposed

thousands of innocent employees who were not told of the dangers.

Big businesses have taken away the health + even the life of many steel workers. Please do not permit them to now take away their rights to justice + access to the court systems

Sincerely,
Mary Johnson

father: Joseph J. Jones
retired from McLouth Steel Corp.
