IN REGARDS TO COURT RULE No 2003-47

11-13-03
Brooklyn Mich

TO WHOM IT MAY CONCERN

I was employed by the Detroit Edison Co. at the Conners Creek Power Plant for 31 years.

As a Power Plant Operator I was continually exposed to asbestos fibers and dust while carrying out my duties. These duties included being in constant attendance, while repairs were being made to valves, ductwork, machines and piping covered with asbestos coverings. While these repairs were being made I was required to give the workers protection from water steam or air pressures.

The particles and dust from these asbestos products were drifting throughout the floors of the plant. Most power plants have grating instead of solid floors and this made the distribution of the asbestos more prevalent. The company made little effort to keep asbestos residue from being disposed of properly or give workers masks to cover their nose or mouth.

RECEIVED
NOV 18 2003
CORBIN R. DAVIS
CLERK SUPREME COURT

I have been diagnosed with pre-cancerous mesothelioma that a severe cold or low resistance can result in my death or disability. The Company was responsible for my exposure, why should they not be responsible for my health care or compensation?

Leonard M. Owczarzak
Senior Power Plant Operator
Detroit Edison Company
