Comment:

I agree with all my fellow Judicial Officers and others who oppose this change. Over the past 25 years as a judge, I have done what I can to limit public information about myself and family because of the job I perform and some of the threats received. We are working on Judicial security Bills and have been for some time. This proposal undermines any potential security concern we are trying to eliminate. My local community also recognizes concerns and allows me to remove my real estate from GIS public searches as they do for Police or Federal agents due to security concerns outlined by others. I believe what is required by SCAO currently is sufficient. . Thank you for allowing comment.
