Comment:

I agree with all my fellow Judicial Officers and others who oppose the proposal to expand the financial disclosure to spouses and adult children. I believe that if there is a complaint or reason to believe a judicial officer is violating the rules of judicial conduct they should be investigated by the MJTC and their finances can be combed through. But to require this disclosure preemptively is very invasive of the privacy of not just the judicial officer but also their families, poses a security concern again not just for the judicial officer but also their families, and undermines the court's efforts to protect Judicial officers. I believe what is currently required by SCAO is sufficient. Thank you for allowing comment.
