Comment:

This law is crazy why should someone be able to avoid paying rent to live in a place. I have adult children living in my house to save money to move out and get a place. Part of the reason they are staying with me still is that they have looked at apartments to rent and the waiting list is 6 months out. This is probably because people are staying there and not being removed even when not paying their rent. We all need to pay our share of what we owe. Nothing is free and people who believe that they can stay somewhere or have something for free is wrong. It will cost all the good paying citizens in the state.
