Comment:

This proposal is terrible for landlords and renters alike. The trickle down of consequences from these outrageous changes will be detrimental to our industry – as the temporary changes already have been. The burden being placed on landlords is creating a ‘free for all’ environment that courts are encouraging which is completely unacceptable. Landlords have consistently maintained core operations and standards throughout the Covid-19 pandemic, while our court system not only completely shut down for periods of time but failed to adhere to the laws that we are governed by.
