Comment:

A person should be allowed to in-good-faith present themselves to a governmental body for the express purpose of defending themselves in Court or otherwise filing matters of legal significance without being placed in jeopardy by officers of an increasingly un-just system wherein people - who often did come legally to the country by the laws that were initially in place - are seized without respect to due process or to the right to not be confined against one's will.

Adopt this amendment to prohibit ICE arrests conducted unilaterally without proper procedural standing.
